We have received authorization to add two more positions to the Arabic monitoring staff at Kyrenia, making a total of four additions since my meeting with you at Caversham last March. We may be asking you for assistance in expediting the promurement for Kyrenia of Creek equipment for handling AMA when the letter converts to radioteletype. I understand that an order for such equipment would mornally require esven months for delivery. It seems most mulikely that there would be this much advance notice of an AMA changeover. In the meantime, I have asked Andy to attempt to find out when this any happen.

we can go sheed.

I have suggested to Andy that she solicit your views on holding the semi-amumal Kyrenia-Caversham coverage coordination meeting during the same week as our Joint FRIS-REC Coordination Committee Meeting. This would have the advantage from our point of view of bringing to London for committation with me and would, I should think, facilitate our own discussions. If running the two meetings at once is impractical from your point of view, please let me know.

STAT

Although I have no confirmed reservations yet, I am planning to arrive in London by air on Subday 2 December and to leave for Washington on Saturday the 8th. I am trying to follow half way in your footsteps and return home by see on the "United States" from Southwayton. In any event I will spend the whole week in England.

Tom Weiss gave us gloring reports on the splendid ecoperation your people have given our London Bureau in the matter of standardisation of techniques. We are most appreciative of the efforts the BBC staff have made in this direction.

Sincerely,

STAT

Chief, PBIS
